

INVESTMENT POLICY
TULSA GEOLOGICAL SOCIETY FOUNDATION

The overall investment objectives are to maximize Foundation returns consistent with risk levels acceptable to the Board, while at the same time utilizing prudent portfolio diversification to limit the Foundation's exposure to unsystematic risk. Furthermore, investment results are the critical element in achieving the Foundation's investment objectives. Therefore, every reasonable attempt is made to control costs of administering and managing the Foundation's portfolio.

The Foundation's invested funds are with the Tulsa Community Foundation (tulsacf.org) in a moderate allocation strategy of equities and fixed income investments. The Board allocates approximately 80% of the Foundation's assets under TCF management and 20% in cash and short term fixed income instruments.
